-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over WO 97/23078 in the view of Kim (U.S Patent No. 5,889,480).

Regarding claim 1, Wo 97/23078 discloses that in a multiprocessor digital signal processing system, col.8 lines 1-10, the combination comprising:

a plurality of processors, figure 3a;

analog subsystems 13 (coder/decoder) to selectively input one of a plurality of analog signals and to selectively output an encoded signal to the plurality of processors through a time division multiplexed channel connecting to the single coder/decoder to the plurality of processors, col.8 lines 5-10, figure 3a.

Wo97/23078 does not disclose a single coder/decoder used in the multiprocessor digital system. Kim discloses a signal coder/decoder 150 used in the system device, figure 1. Therefore, it would have been obvious to one having ordinary skill in the art to have the single coder/decoder used in the multiprocessor digital system so that the complexity of the circuit can be reduced.

Allowable Subject Matter

2. Claims 3-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

3. Claims 2, 6, 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
